## PROJECTS

studyflow 0

**Full Stack Development, Business**

📅 August 2021 - May 2022

- Students create “studyflows,” which integrate Notability, OneDrive, Todoist, and Notion. Review tasks and note templates are created as soon as a student takes a note on their iPad.
- Created REST API with Nodejs, Expressjs, PostgreSQL, Google Cloud Functions, and AWS RDS. Frontend created in React.
- Made AWS EC2 daemon to poll user’s OneDrive account for new notes in specified folders.

**Art Portfolio Website: sierraapicella.com**

**Full Stack Development, Human Relations**

📅 March 2020 - May 2021

- Worked with local artist to create art showcase and marketplace website. Created an interface so the artist easily can add, delete, and change the prices for each piece of their portfolio.
- Created REST API with Nodejs, Expressjs, PostgreSQL, Google Cloud Functions, and AWS RDS. Frontend created in React.
